

SERMAS® CIRCULAR SAW BLADES

FOR HIGHER PRODUCTIVITY OF YOUR PROCESS

A large range of circular saw-blades dedicated to industrial cutting for all types of machines and for all materials & sections. From small standard up to 1900mm-diameter, we define most adapted blade (tooth pitch, geometry, quality, etc.) to match customer's application & production's requirements: surface finish, longevity, productivity...

- High performance & profitability of the machine
- Low power consumption
- Lifetime extension when using our lubricants **SERMALUBE**®

Billet cutting

Plate sawing

RANGE OF PRODUCTS

All our blades are manufactured with top-quality raw materials and engineered design to offer optimal behavior of the blade while cutting.

- HSS saw (high-speed steel)
- TCT precision blades (tungsten carbide tipped)
- Diamond concretions

ASK FOR OPTIMAL LUBRICATION

sermaLUBE® has been developed by SERMAS for optimum lubrication, high-speed cutting applications (sheet, plate, ingot, billets) and surfacing aluminium plates. It is particularly optimized for our **SERMALUBE**® lubricants

SERMAS® ASSOCIATED SERVICES

- Back Office dedicated to quotations, order processing & after-sales
- A technician dedicated to on-site trials & tests
- Dedicated stock at Sermas for regular orders
- Annual agreement with clocked shipments

A specialist at your service for any inquiry or technical assistance:

Damien Ventura - ☎ +33 (0)4 76 07 66 18 - ✉ email: d.ventura@sermas.com

& a dedicated email address for all your consumables requests: services@sermas.com
